

Spring '86

CE 692

ENVIRONMENTAL ENGINEERING SEMINAR

Spring 1986

F 3:00-5:00
Marston 232

January 31	(Reserved for CE 692 registrants)
February 7	Introductory Meeting
February 14	Drew McAvoy, UMass/Amherst "Aluminum Transport in a Watershed System Due to Acid Rain Effects"
February 21	Charles T. Driscoll, Syracuse University "Aluminum Chemistry"
February 28	C. James Martel, Cold Regions Research Laboratory "Sludge Freezing"
March 7	Wayne Chudyk, Tufts University "A Prototype Laser Fluorescence/Fiber Optics Groundwater Contaminant Detector"
March 14	SPRING
March 21	RECESS
March 28	Terry Miller, New York State Dept. of Health "Methane Production in the GI Tract"
April 4	Tony Collins, Clarkson College of Technology "Modelling an Ammonia Stripper for a Semiconductor Wastewater"
April 11	Robert F. Hickey, UMass/Amherst "Trace Gas Monitoring in Anaerobic Digestion"
April 18	Taylor Eighmy, University of New Hampshire "Substrate Transport Systems in Wastewater Biofilms"
April 25	James W. Morris, University of Vermont
May 2	Student Seminars
May 9	Student Seminars
