Installation Error- GAUT

Error: Linux/resource/jre/bin/java: not found ubuntu
/tmp/install.dir.30906/Linux/resource/jre/bin/java: not found

This error occurs because the installer is itself a 32-bit binary using 32-bit binaries, which may cause problems on a 64-bit machine. It needs 32-bit libraries installed.

On an Ubuntu 64-bit Linux machine, to work around this issue, install the package "ia32-libs":

You can try the following command to install 32 lib (not the entire content of ia32-libs):

   apt-get install program:i386.

Or if you want to install the whole ia32-lib instead, try the following commands:

   sudo -i
   cd /etc/apt/sources.list.d
   echo "deb http://old-releases.ubuntu.com/ubuntu/ raring main restricted universe multiverse" >ia32-libs-raring.list
   apt-get update
   apt-get install ia32-libs
