# ECE 241 – HOMEWORK 4  Solution   Fall 2021

**Most of the solutions are in the code files.**
Example: (question1_sol.py, question2_sol.py, question3_sol.py)

## Questions

### 1.  Longest Palindrome Problem: Dynamic Programming (30 points)
You are given a string of length greater than 0 and less than 1000. Find the Longest palindrome. https://en.wikipedia.org/wiki/Palindrome
What is the run-time complexity of the solution?

The code template has been provided. All Answers should be provided in the code.

*See posted code.*

### 2.   Farmer's Fence (40 points) ( Greedy )  A farmer wants to build a fence
around his rectangular (a x b) field (see figure below). The planks that can be used to build the fence are of length plankList = [1,5,10, 21, 25]. The corresponding colors of the planks are plankColor = {1:'black',5:'red',10:'black',21:'green',25:'violet'}. Using dynamic programing choose the least number of planks to make 'a' and 'b' dimension of the rectangle.
Code template has been provided.

*See posted code.*

## 3. Tree Traversal (10 Points)

Tree/Graph traversal can be done in multiple ways. The basic methods of graph traversal are Breadth First Search and Depth First Search.

https://en.wikipedia.org/wiki/Tree_traversal
https://en.wikipedia.org/wiki/Graph_traversal

In the Template provided, show which tree traversal method is best suited for each solution. **Note**: the results won't be shown in Gradescope, you will see the results and your total score after due.

*See posted code.*

## 4. Dijkstra's Algorithm  (20 points):

Consider the following network. With the indicated link costs, use Djikstra's shortest-path algorithm to compute the table of shortest paths from A to all other network nodes. Show how the algorithm works by filling out the table below. Use column "N'" for "all visited nodes in current step", and each row for "distance and predecessor of each destination node once a new node is visited".

Your solution should be in a table format as shown below. You can submit images or pdf files to gradescope.
Solution:

| N' | D(B), P(B) | D(C), P(C) | D(D), P(D) | D(E), P(E) | D(F), P(F) | D(G), P(G) | D(H), P(H) |
|---|---|---|---|---|---|---|---|
| A, | 8,A | 2,A | 5,A | INF | INF | INF | INF |
| A,C | 8,A | 2,A | 4,C | 7,C | INF | INF | INF |
| A,C,D | 6,D | 2,A | 4,C | 5,D | 10,D | 7,D | INF |
| A,C,D,E | 6,D | 2,A | 4,C | 5,D | 10,D | 6,E | INF |
| A,C,D,E,G | 6,D | 2,A | 4,C | 5,D | 8,G | 6,E | 12,G |
| A,C,D,E,G,F | 6,D | 2,A | 4,C | 5,D | 8,G | 6,E | 11,F |
| A,C,D,E,G,F,H | 6,D | 2,A | 4,C | 5,D | 8,G | 6,E | 11,F |
