

100 Before Servicing the Instrument

110 Safety

Cautions	1
Printed circuit boards.....	1
Voltage carrying components	1
Columns.....	1
TCD Detector	1
Warnings.....	2
Heated components	2
Voltage carrying components	2
Insulation.....	3
Gases.....	3

120 Tools Required

Tools required.....	1
Basic.....	1
Specialized	2

130 Calibration Notes

Calibrating the 6890 GC.....	1
Calibration options	1
Factory calibrations	2

200 Inlets

210 Split/Splitless Inlet

Theory of operation	1
EPC inlet	2
Split mode operation	2
Pulsed split mode	2
Splitless mode.....	3
Pulsed splitless mode	4
Gas saver mode	4

Manually controlled inlet.....5

 Split mode5

 Splitless mode6

Replacement procedures8

 Removing the inlet.....8

 Top insert assembly replacement.....9

 Heater/sensor assembly replacement11

 Reinstalling the inlet.....11

 Replacing the split vent trap.....13

 Replacing the split vent trap filter cartridge.....15

 Replacing the inlet EPC flow manifold17

 Replacing the supply fitting on a Type 1 flow manifold.....18

Leak testing—EPC and manual inlets.....19

 Preparation19

 Performing the leak test—EPC inlets21

 Performing the leak test—manual inlets24

Leak testing the EPC module only.....26

 Forward pressure valve leaks27

 Locating leaks on the flow manifold27

 Correcting leaks29

 Potential leak points.....30

220 Purged/Packed Inlet

Theory of operation.....1

 EPC inlet1

 Manually controlled inlet3

Replacement procedures4

 Replacing the inlet4

 Replacing an EPC flow manifold8

 Replacing the supply fitting on a Type 1 EPC manifold.....9

Leak testing—EPC and manual inlets	10
Preparation	10
Performing the leak test—EPC inlets.....	12
Performing the leak test—manual inlets.....	14
Leak testing the EPC module only	15
Forward pressure valve leaks.....	16
Locating leaks on the flow manifold.....	16
Correcting leaks	18
Potential leak points	19
 230 Cool On-Column Inlet	
Theory of operation	1
EPC inlet.....	2
Manually controlled inlet	3
Replacement procedures	4
Replacing the inlet	4
Replacing the heater/sensor assembly	7
Replacing the inlet EPC flow manifold	8
Replacing the supply fitting on a Type 1 EPC flow manifold	9
Leak testing EPC and manual inlets	10
Preparation	10
Performing the leak test—EPC inlets.....	12
Performing the leak test—manual inlets.....	14
Leak testing the EPC module only	15
Forward pressure valve leaks.....	15
Locating leaks.....	16
Correcting leaks	18
Potential leak points	19
 240 Programmed Temperature Vaporization Inlet (PTV)	
Theory of operation	1
Operating modes	1
Sampling heads.....	2

Split modes	3
Septum head installed	3
Septumless head installed.....	4
Pulsed split modes	5
Splitless modes.....	6
Pulsed splitless mode	8
Solvent vent mode	9
Stage 1: Sample and vent	9
Stage 2: Sample transfer.....	11
Stage 3: Purge and cleanup.....	12
Replacement procedures	13
Replacing the PTV inlet, pneumatics, and manifold.....	13
Replacing the PTV with cooling assembly	16
Replacing the CO ₂ or LN ₂ inlet cryo assembly.....	18
Replacing the PTV manifold assembly	19
Removing both the manifold and plumbing assemblies	22
Replacing the plumbing assemblies	23
Replacing a gang fitting restrictor or O-ring.....	25
Replacing the PTV thermocouple PCB	25
Replacing the filter.....	26
Replacing the inlet adapter	27
Installing the column	28
Removing the septumless head.....	29
Cleaning the septumless head	30
Replacing the Teflon ferrule.....	32
Removing/replacing the septum head	33
Replacing the septum	35
Replacing the liner	35
Diagnostics	38
Shutdown behavior.....	38
Leak testing.....	39
Preparation	39
Performing the leak test.....	40

Leak testing the PTV module only	42
Forward pressure valve leaks.....	43
Locating leaks on the flow manifold.....	43
Correcting leaks	45
Potential leak points	45
 250 Volatiles Interface	
Theory of operation	1
Split mode	1
Splitless mode.....	2
Direct mode	4
Gas saver	7
Replacement procedures	8
Replacing or cleaning the interface	8
Replacing the heater/sensor assembly	11
Replacing the EPC manifold.....	14
Calibrating your interface	18
Replacing the filter.....	19
Replacing or cleaning restrictors	20
Replacing the gang fitting.....	21
Leak testing the volatiles interface	22
Leak checking.....	22
Preparing the interface for a leak test	25
Leak testing the EPC module only.....	26
Forward pressure valve leaks.....	27
Locating leaks on the flow manifold.....	27
Correcting leaks	29
Potential leak areas.....	30
 260 Solvent Vapor Exit Accessory	
Theory of operation	1
Replacement procedures	2
Replacing the valve/fitting assembly	2
Replacing the bleed restrictor column	4
Replacing the tri-column assembly.....	5
Replacing the pre-column assembly	6

Leak testing..... 7

 Potential leak points..... 7

 Leak testing the tri-column assembly..... 7

 Leak testing the SVE assembly..... 9

270 Pneumatics Control Module

Theory of operation..... 1

Replacement procedures 2

 Replacing the PCM..... 2

 Replacing the PCM gang weldment..... 4

 Calibrating the PCM interface 5

Leak testing the PCM..... 7

 Forward pressure valve leaks 8

 Locating leaks on the flow manifold 8

 Correcting leaks 10

 Potential leak areas 10

300 Detectors

310 Flame Ionization Detector (FID)

Theory of operation..... 1

 EPC detector 1

 Manually controlled detector 2

Replacement procedures 4

 Replacing the entire detector 4

 Replacing the detector weldment..... 8

 Replacing the collector assembly 9

 Replacing the FID jet..... 11

 Removing the electrometer 13

 Removing a flow manifold 14

 Installing a manifold 16

 Removing the FID interface board 20

Diagnostics 22

 FID ignition problems 22

Cleaning an FID jet and collector	23
Cleaning the collector.....	23
Cleaning the jet.....	23
320 Nitrogen Phosphorus Detector (NPD)	
Theory of operation	1
EPC detector.....	1
Manually controlled detector	3
Recommended settings	4
Equilibration time	4
Turning hydrogen off during a solvent peak.....	4
Turning hydrogen off between runs	4
Bead voltage.....	4
Extending the life of the bead	4
Temperature programming	5
Jets and collectors	5
Correcting NPD hardware problems	7
Replacement procedures	10
Software	10
Replacing the entire detector	10
Replacing the active element (bead)	13
Removing the collector assembly	16
Replacing the jet.....	18
Removing the electrometer.....	19
Removing an EPC flow manifold	20
Installing a Type 2 manifold.....	22
Replacing the detector interface board.....	28
Cleaning the NPD jet and collector	30
Cleaning the collector.....	30
Cleaning the jet.....	31

330	Thermal Conductivity Detector (TCD)	
	Theory of operation.....	1
	Delta PRT	3
	Error messages.....	4
	EPC detector	5
	Manually controlled detector	5
	Replacement procedures	7
	Replacing the entire detector	7
	Replacing the detector cell	10
	Removing an EPC flow manifold	13
	Installing a Type 2 manifold	15
	Replacing the detector interface card	21
	Cleaning the Thermal Conductivity Detector	23
340	Electron Capture Detector (ECD)	
	Theory of operation.....	1
	EPC detector	2
	Manually controlled detector	2
	Replacement procedures	4
	Replacing the entire detector/detector cell	4
	Replacing the heater/sensor assembly	8
	Replacing the makeup gas adapter.....	10
	Removing the EPC flow manifold.....	11
	Removing the signal board	14
	Replacing the detector interface card	16
	Diagnostics	17
	Frequency test.....	17
	Leak test.....	18
	Troubleshooting contamination problems	20
	Ensure clean gas supplies.....	20
	Isolate problem to carrier or makeup gas supplies	20
	Evaluate the makeup side	21
	Evaluate the carrier side	22
	Maintaining an ECD detector	23
	ECD bakeout	23
	Performing a radioactivity leak test (wipe test)	24

341	Micro-cell Electron Capture Detector (μ-ECD)	
	Theory of operation	1
	EPC detector.....	2
	Replacement procedures	3
	Replacing the entire detector/detector cell	3
	Replacing the heater/sensor assembly	6
	Replacing the makeup gas adapter	9
	Removing an EPC flow manifold	11
	Installing a Type 2 manifold.....	13
	Removing the signal board.....	18
	Replacing the detector interface card	20
	Diagnostics.....	22
	Frequency test	22
	Leak test	23
	Maintaining a μ -ECD detector	25
	μ -ECD bakeout (thermal cleaning).....	25
	Performing a radioactivity leak test (wipe test).....	26
 350	 Flame Photometric Detector (FPD)	
	Theory of operation	1
	Single wavelength FPD.....	2
	Dual wavelength FPD	3
	Operating conditions	3
	Replacement procedures	4
	Replacing the entire detector	4
	Column installation.....	6
	Cleaning/replacing windows, filters, and seals	8
	Cleaning/replacing the jet	12
	Replacing the transfer line fused silica liner	15
	Replacing the photomultiplier tube	18
	Replacing the heater/sensor assemblies	20
	Replacing the ignitor glow plug.....	22
	Removing an FPD flow manifold	24
	Installing a Type 2 manifold.....	25

Diagnostics	32
Quenching effects	32
PMT saturation	32
Detector temperature considerations	32
Flame ignition problems	33
Leak testing.....	35
Potential leaks areas.....	35
360 Auxiliary EPC	
Theory of operation.....	1
External flow restrictor (Type 2 manifold)	1
Replacement procedures	4
Removing the auxiliary manifold (type 1 or type 2)	4
Installing a type 2 manifold.....	6
Changing an auxiliary channel frit.....	14
400 Mainframe	
410 Covers and Fans	
Plastic covers	1
Metal covers	2
Removing the electronics cover.....	3
Removing the detector cover	4
Replacing the detector top cover.....	6
Removing the pneumatics top cover	8
Removing the pneumatics RFI shielding	8
Removing the left side cover	9
Removing the right side cover.....	10
Removing the ALS tray bracket	11
Removing the inlet carrier cover	12
Removing the inlet carrier	13
Removing the rear covers	14
Removing the top rear cover	14
Removing the bottom rear cover	15
Removing the injection port fan cover.....	16

Removing the injection port fan.....	16
Removing the keyboard	17
Removing the pneumatics area fan.....	18
Chassis mounted fan.....	18
Bracket mounted fan	19
 420 Oven and Temperature Control	
Heated zones.....	1
Oven ramp rates	1
Configuring the GC for an MSD.....	2
Oven temperature troubleshooting.....	3
Testing resistance of the heater coil.....	4
Cryo valve installation/replacement	5
Installing a new cryo valve.....	5
Replacing an existing cryo valve	7
Replacing the oven shroud assembly	10
Replacing the oven sensor	13
Replacing the oven fan	14
Replacing the oven fan motor	15
Replacing the oven flap motor	17
Converting the oven type	19
Configuring the oven	19
 430 Power/Electronics Replacement	
Replacing the main board	1
Installing an MIO card (6890A and 6890 Plus)	7
Replacing ROMs on the main board (6890A and 6890 Plus)	11
Removing a ROM.....	11
Inserting a ROM.....	12
Replacing the battery.....	13
Replacing the pneumatics board.....	14
Replacing the PCB bracket	15
Replacing the transformer—GC serial number < 10225	17
Replacing the transformer—GC serial number ≥ 10225	19
Replacing the ALS Interface Board.....	23

500 Site Preparation

510 Environmental

Temperature and humidity ranges.....	1
Ventilation requirements.....	1
Venting oven exhaust	1
Venting toxic or noxious gases	2
Benchtop space requirements.....	2

520 Gases

Gas requirements.....	1
Gases for packed columns.....	1
Gases for capillary columns	2
Gas purity	4
The gas plumbing.....	5
Supply tubing for carrier and detector gases	6
Two-stage pressure regulators	7
Pressure regulator-gas supply tubing connections.....	7
Traps.....	8
Cryogenic cooling requirements	9
Choosing a coolant	9
Using carbon dioxide.....	10
Using liquid nitrogen	12
Supplying valve actuator air	13

530 Power

Grounding	1
Line voltage.....	1
USA fast heating oven	2
Canadian installation.....	3

540 Instrument Specifications

Physical specifications	1
Dimensions and average weight.....	1
Laboratory environmental conditions	1
Safety certifications	1
Data communications.....	1
Heated zones.....	1
Column oven.....	2
Inlets	3
Detectors	4
FID	4
NPD	4
TCD	5
ECD	5
μ -ECD.....	5
FPD	5
AED	5
MSD.....	5

600 Performance Verification

610 Checkout Chromatograms

FID checkout conditions and chromatogram	2
Typical values	5
NPD checkout conditions and chromatogram.....	6
Typical values	9
TCD checkout conditions and chromatogram	10
Typical values	13
ECD checkout conditions and chromatogram.....	14
Typical values	17
Microcell ECD checkout conditions and chromatogram	18
Typical values	21
FPD checkout conditions and chromatogram	22
Typical values	25

700 Preventive Maintenance

800 Error Codes and Internal Diagnostics

810 Overview

Error message types	1
Not ready	1
Method mismatch	1
Warnings	2
Shutdowns	2
Faults	2
Bad mainboard and fatal errors	2

820 Not Ready Messages

Oven temperature not ready	1
Temperature zone not ready	2
Pressure and/or flow not ready	3
Detector not ready	4
Valve not ready	7
Miscellaneous messages	8

830	Warning Codes	
840	Shutdowns	
850	Faults	
860	Bad Mainboard and Fatal Errors	
900	Remote Access	
1000	Cabling Configuration and Electronics	
1010	Cabling Diagrams, 6890A and 6890 Plus	
	Overview of 6890 GC cable connections.....	1
	6890 GC	
	GC ChemStation	
	GC Automatic Liquid Sampler	2
	6890 GC	
	Mass Selective Detector

1020 Cable Electronics

Analog signal outputs	1
Analog cable — GC to 3395A/B or 3396B/C Integrators and	
35900 C/D/E Analog to Digital Interface instrument	1
Analog cable — general use	2
Automatic sampler, 6890A GC	3
Cable pinouts, 6890 GC to Automatic Liquid Sampler	3
Automatic sampler, 6890 Plus and 6890N GCs	4
6890 Plus	4
6890N	4
BCD Inputs	6
6890A and 6890 Plus	6
6890N	7

External event	8
Modem/RS-232C	9
Cable pinouts, 6890 GC to Computer via RS-232, 9-pin/9-pin	9
Cable pinouts, 6890 GC to Computer via RS-232, 9-pin/25-pin ...	10
Cable pinouts, 6890 GC to Modem, 9 pin/9-pin	11
Cable pinouts, 6890 GC to Modem, 9-pin/25-pin	12
Remote	13
Cable pinouts, remote start/stop, general use	13
Cable pinouts, GC to 35900C, D, E/MSD/Sampler, 2 meters	14
Cable pinouts, 6890 GC to 3395A/3396B Integrator	15
Cable pinouts, 6890 GC to 3395B/3396C Integrator	16
Cable pinouts, 6890 GC to 7694 Headspace Sampler	17
Cable pinouts, APG Remote Y-cable	18

1100 Valves

1110 Valves

Introduction.....	1
Valco W-series minivalves	2
Valve bodies.....	3
Valve rotors.....	3
General purpose valves.....	4
Gas sample valves.....	4
Gas sample loops	4
Adjustable restrictor valves.....	4
Liquid sample valves.....	5
Temperature ranges.....	5
Adjustable restrictor valve.....	5

1120 Valve Box

Installing the valve box	1
Removing the valve box assembly.....	8

1130 Actuators

Installing the actuators.....	1
-------------------------------	---

Valve drivers	4
Installing the valve actuator drivers	5
Assemble the valve driver block	5
Install the bracket and cabling	7
Install the valve driver block	8
Valve actuator alignment.....	10

1140 Typical Valve Configurations

1150 Troubleshooting

Chromatographic symptoms	1
Loss of sensitivity or excessive drift.....	2
Loss of peaks in specific areas of the chromatogram	2
Extraneous peaks.....	3
Peak broadening and tailing	3
Baseline shifts.....	3
Baseline upsets.....	4
Variation in peak area and retention time.....	4
Pressure check	5

1200 Electrical

1210 External Connectors, 6890A and 6890 Plus

Overview	1
Signal 1/Signal 2 analog out	3
APG remote start/stop	4
Signal descriptions	5
APG remote control	5
RS-232	7
Signal descriptions	8
External event	9
BCD inputs.....	10
GPIB	11
Modular Input/Output (MIO) INET.....	12
Modular Input/Output (MIO) LAN	13

Sampler injector or tray 14

1215 External Connectors, 6890N

Overview 1

Samplers and Tray 2

Signal 1/Signal 2 analog out 3

Local Area Network (LAN)..... 4

RS-232..... 5

 Signal descriptions..... 6

Remote start/stop..... 7

 Signal descriptions..... 7

 Remote control..... 8

External event 9

BCD inputs..... 10

1220 Main Board, 6890A and 6890 Plus

Test points 1

Connector electronics 2

Fuses..... 5

Circuitry diagrams 6

1225 Main Board, 6890N

General board layout..... 1

Connectors..... 3

Fuses..... 5

1230 Power Supply

Setting the instrument power configuration 1

 Line voltage configuration plug..... 2

 Ceramic fuses 2

 Oven shroud..... 3

Replaceable AC board fuses..... 4

AC power board connectors..... 5

AC power board circuitry 7

Testing resistance of the heater coil 9

1240 Wiring Harnesses

Inlet/Detector harness (G1530-60640)	2
Auxiliary Zone/Valve Box Harness (G1530-60660)	4
PTV TC-PCB Cable Assembly	6
Temperature sensor resistance	7

1300 Illustrated Parts Breakdown

1310 Inlets

Split/splitless inlet	2
Split/splitless inlet column liners	5
Split/splitless inlet EPC pneumatic module.....	5
Pneumatic carrier assembly G1585A	7
Pneumatic carrier assembly	8
Split/splitless inlet manual pneumatic module	9
Capillary injection port (0 to 30 psig).....	11
Capillary injection port subassembly (0 to 30 psig)	11
Purged/packed inlet	12
Purged/packed inlet EPC pneumatic module.....	14
Purged/packed inlet manual pneumatic module and inlet	16
Packed Inlet Optional Flow Restrictors	16
Packed column injection port supplies	18
Programmable cool on-column capillary inlet	19
Programmable cool on-column EPC pneumatic module.....	21
Programmed temperature vaporization inlet	22
Programmed temperature vaporization inlet calibrated manifold assembly	24
PTV LCO ₂ cryo assembly	26
PTV LN ₂ cryo assembly	27
Volatiles interface	28
Volatiles interface calibrated manifold assembly	30
Solvent vapor exit accessory	32
Pneumatics control module.....	34

1320 Detectors

Electron Capture Detector (ECD)	2
Electron Capture Detector manifold assembly	4
Flame Ionization Detector (FID)	6
Flame Ionization Detector manifold assembly	8
Nitrogen Phosphorus Detector (NPD)	10
Nitrogen Phosphorus Detector manifold assembly	12
Thermal Conductivity Detector (TCD)	14
Thermal Conductivity Detector manifold assembly.....	16
Microcell Electron Capture Detector (μ ECD)	18
Microcell Electron Capture Detector manifold assembly	20
Flame Photometric Detector (FPD).....	22
Flame Photometric Detector jet and transfer tube assemblies	24
Flame Photometric Detector PMT and bracket assemblies.....	26
Flame Photometric Detector covers, manifolds, and electronics	28
Auxiliary flow block	30

1330 Covers

Metal covers	2
Plastic covers	4
Manual inlet flow manifold carrier (G1585A accessory)	6

1340 Oven

Oven assembly	2
Oven flapper assembly	4
CO ₂ cryogenic cooling.....	6
Liquid nitrogen cryogenic cooling	8

1350 Valves

Valve box assembly	2
Valve driver assembly	4
Valve actuator assembly (1 of 2)	6
Valve actuator assembly (2 of 2)	8
Valco W-series minivalve	10
Nickel catalyst assembly	12

1360 Electrical

AC Power components	2
AC Power circuit board	4
Main circuit board, 6890A and 6890 Plus	6
Main circuit board, 6890N	8
Modular input/output (MIO) components (6890A and 6890 Plus)	9
INET components	9
LAN components	9
Pneumatics circuit boards	11
Analog input board (G1556A accessory)	13
LAN board, 6890N	14
Chassis fans	15
Chassis fans	15
ALS interface board (G2612A accessory, 6890 Plus only)	16
