Final Project Guidelines

Project guidelines:

1. Choose a simple analysis project that will allow you to increase your ability to do finite element analysis and demonstrate what you have learned as a modeler.

2. Double space all text, use 12 pt font,

3. place figures and tables at the appropriate places in the document,

4. number and caption all figures and tables,

5. refer to all tables and figures in the body of the text,

6. include a list of references at the end of the report, formatted according to any style you choose, but the formatting must be consistent within the list,

7. refer to all references in the body of the text in a consistent format of your choosing

8. do not exceed 5 pages double spaced, including figures and tables but not references.

9. Project report due May 1, 4PM at Prof. Arwade’s office.
